Professional Summary

Passionate and results-driven Full Stack Software Engineer with over 3 years of experience in designing and developing scalable web applications. With more than 1 year of hands-on work experience, I have successfully delivered projects for multiple clients as a freelancer and currently contribute as a Frontend Developer at Crawdwall Company. Skilled in modern web technologies, I build efficient, user-friendly solutions and maintain a high academic grade while continuously improving my technical expertise.

Skills

- **Languages:** JavaScript, TypeScript, Java, Python, PHP
- **Front-End:** Bootstrap 5, SASS, Tailwind CSS, jQuery, React, Angular, Next.js, Framer Motion
- **Back-End:** Node.js, Express, Laravel, Firebase, Flask, Spring Boot
- **Database:** MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub, Docker, Stripe, Paystack, RESTful APIs, Machine Learning Integration

September 2027

Oyo, Nigeria
Graduated: February 2024
Oyo, Nigeria

Work Experience

Frontend Developer (Part-time) – Crawdwall Company

2025 – Present

- Develop responsive and dynamic web pages, ensuring seamless UI/UX
- Integrate frontend applications with backend APIs, enhancing performance and user experience

- Collaborate with backend developers to optimize API responses and enhance application efficiency
- Ensure cross-browser compatibility and performance optimizations for better user experience

Freelance Full Stack Developer

2025 – Present

- Built and maintained applications for over 5 clients, handling both frontend and backend development
- Developed new features and optimized existing projects for performance and scalability
- Provided technical consultation and debugging services for complex development issues
- Designed and implemented secure authentication and role-based access control for client applications

Projects

Buzz Chat - Real-Time Communication Platform

Dec 2024 – Mar 2025

- Developed a feature-rich messaging platform enabling real-time text chat, voice calls, and video conferencing with WebRTC technology
- Implemented instant messaging with Socket.IO for seamless communication
- Designed group chat functionality and peer-to-peer connections with optimized data transfer

Hope Academy – Full Stack Web Application

May 2023 – Dec 2023

- Designed and built an interactive Learning Management System (LMS) for students, teachers, and administrators
- Implemented a secure payment system using Paystack for seamless transactions
- Developed real-time features including live video classes, interactive chat, and automated grading systems

Milki Hotel – Full Stack Web Application

Feb 2024 – Oct 2024

- Created a seamless room booking platform with real-time availability tracking
- Developed an admin dashboard for managing reservations, rooms, and payments
- Integrated payment processing and automated receipt generation for customers

Certifications

Stuthern Hackathon: Full Stack Developer
