Oyo State, Nigeria

## Summary

Results-driven Full Stack Software Engineer with 3+ years of experience building scalable applications and delivering solutions for startups and clients. Skilled in designing efficient systems, optimizing backend performance, and creating seamless user experiences. I am seeking opportunities to leverage my technical expertise in both backend and frontend development to contribute to impactful projects and deliver measurable business results.

## Skills

- **Languages:** JavaScript, TypeScript, Java, Python, PHP
- **Front-End:** React, Angular, Next.js, Tailwind CSS, Bootstrap 5, SASS, jQuery, Framer Motion
- **Back-End:** Node.js, Express, NestJs, Laravel, Firebase, Flask, Spring Boot
- **Database:** MongoDB, MySQL, PostgreSQL
- **Tools & Platforms:** AWS, Git, GitHub, Docker, Stripe, Paystack, RESTful APIs, Machine Learning Integration
- **Performance Optimization:** Caching, Load Balancing, Database Indexing
- **Soft Skills:** Problem-Solving, Teamwork, Communication, Adaptability, Time Management, Critical Thinking

## Work Experience

### Chief Technology Officer (CTO) - Tela

May 2025 – Present

- Lead all engineering efforts, overseeing the deployment and production lifecycle for web/mobile applications, backend services, and AI model implementations.
- Developed and maintained an admin overview platform to monitor transactions and activities across the system.
- Refactored and optimized backend code, eliminating critical errors and reducing API response time by 25%.
- Implemented database indexing and caching, improving query performance and reducing load time by 20%.
- Introduced API performance metrics and monitoring, ensuring faster debugging and improved reliability.

### Backend Developer Intern – D’Hub

Apr 2025 – Aug 2025

- Improved API implementation, achieving a 10% reduction in loading time for core features.
- Refactored and optimized database queries for candidate selection, enhancing recruitment efficiency.

- Integrated Google Calendar API for interview scheduling, improving coordination by 30%.

#### **Frontend Developer Intern – Crowdwall**

Dec 2024 – Mar 2025

- Designed and developed responsive user interfaces, ensuring mobile-first, cross-browser compatibility.
- Collaborated with backend team to integrate APIs, reducing frontend API load failures by 15%.
- Improved user engagement with interactive UI elements and optimized page speed performance.

#### **Freelance Full Stack Developer**

2024 – Present

- Delivered end-to-end software solutions for 5+ clients, covering both frontend and backend development.
- Implemented secure authentication and role-based access controls for client applications.
- Optimized applications for scalability, reducing downtime and improving performance by up to 30%.
- Provided ongoing technical support, consultation, and system maintenance for client projects.

## **Projects**

#### **Cleannow Business (Freelance)**

- Built a platform to showcase business services and certification training programs.
- Developed an admin dashboard for managing pricing, bookings, and customer responses.

#### **Client Portfolios (Freelance Projects)**

- Developed a client's personal portfolio with features for news updates, video uploads, subscriptions, and live streaming via WebRTC.
- Integrated Paystack for secure subscription payments; implemented live reactions and chat features for user interaction.
- Built an admin dashboard for content and subscription management, reducing administrative workload by 40%.
- Created another portfolio platform with admin access to manage projects, services, media, and blogs.

## **Education**

#### **Ladoke Akintola University of Technology**

Expected Feb 2027

B.Tech., Computer Science, Oyo, Nigeria

#### **SQI College of ICT**

Graduated Feb 2024

Diploma in Software Engineering, Oyo, Nigeria

## **Certifications**

**Stuthern Hackathon:** Full Stack Developer

Dec 2023

**Jobberman:** Soft Skills Training

Feb 2023
